

Test Corrections Checklist

Before you ask a Math Teacher to check your Test Corrections, ask yourself all of the following questions:

- ✓ Have I rewritten all of the questions for which I lost any points on a fresh sheet of paper (even if it's a loss of only one or two points)?
- ✓ For each of these incorrect answers have I gone through and written down each and every step involved in computing the answer, correcting any and all mistakes I made along the way? Did I include all diagrams and any necessary formulas?
- ✓ If I am not sure what my mistake is did I:
 - Look up the corresponding Lesson in my Textbook? (If I couldn't find it did I use the index?)
 - Look up the corresponding Lesson in my Notebook?
 - Using both my textbook and my notebook, do as much of the problem as possible before asking a Math Teacher for help?
- ✓ Do I have:
 - the original test question sheet?
 - my original answer sheet?
 - the correct answers given by my teacher? (If the answer is "No", see your teacher!)
 - my test corrections?
